

**DODGE**  
GRAB LIFE BY THE HORNS

**2007**

# NITRO

It's been built for people with energy to burn. Those who live one step from ignition every second of every day. Let others wonder if it's time to go. You're gone.

This is your daily dose of adrenaline. This is Dodge Nitro.

Check out the bold look and powerful performance of Nitro

**LOAD 'N GO™**

Nitro's class-exclusive\* LOAD 'N GO™ cargo floor (standard on SLT and R/T) slides 18 inches to make loading heavy or awkward items easier. With a whopping 400-pound capacity and six cargo tie-downs, you'll wonder how you ever lived without it.

**PEOPLE. CARGO. WHATEVER**

Nitro's class-exclusive\* standard fold-down front-passenger and rear 65/35-split folding seats provide the flexibility you need to carry it all without compromise—from five full-sized adults to an 8-foot-long stack of boards.

**REAR SEAT DVD PLAYER**

Why should the driver have all the fun? Nitro's available rear DVD entertainment system (available on SLT and R/T with premium sound system) with auxiliary input jacks, remote control, and two wireless headsets turns second-row seating into a first-class experience. Your favorite movies and video games come to life on the crystal-clear 8-inch LCD screen as the stereo sound pumps through the onboard speakers or wireless headsets for miles of mobile entertainment.

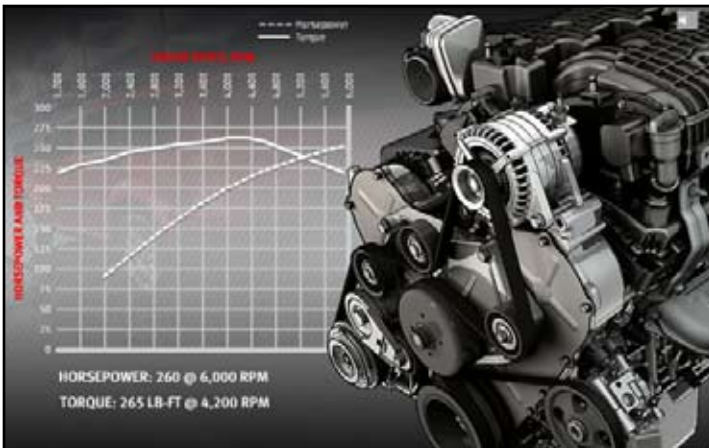

**INFOTAINMENT SYSTEM**

Nitro's available MyGIG™ Multimedia Infotainment System with SIRIUS Satellite Radio and first year of service provided by Dodge gives you high tech for the highway. It features a 6.5-inch full-color touch screen display, voice-activated GPS navigation with turn-by-turn route guidance and real-time traffic reporting via SIRIUS, DVD playback,† and integrated USB port for downloading and storing digital photos and up to 1,600 songs on the internal 20GB hard disk drive.

† MyGIG in-dash DVD capability is not available in all states. See your dealer for details.

\* Based on Automotive News classification.  
 † "SIRIUS" and the SIRIUS Dog Logo are registered trademarks of SIRIUS Satellite Radio, Inc.

**ENGINES**

Packing your choice of two powerful V6 engines, sport- or performance-tuned suspensions, part-time four-wheel-drive system, and a 5,000-pound maximum towing capacity,\* Nitro doesn't play by the rules, it makes them.

**TRANSMISSION**

Nitro's potent 4.0-liter V6 engine delivers its punches through a standard electronically controlled five-speed automatic transmission – the same heavy-duty gearbox found on the mighty 6.1-liter HEMI®-powered Dodge Magnum SRT8, Charger SRT8, Chrysler 300C SRT8, and Jeep® Grand Cherokee SRT8.

3.7-liter V6-powered Nitro vehicles can be equipped with an available four-speed automatic transmission.

**SAFETY**

Nitro has your back with the latest available built-in safety and security features that are not only designed to help protect you and your passengers in the event of an accident, but also help prevent the situations that could lead to an accident in the first place. Nitro's standard Electronic Stability Program (ESP)† includes all-speed traction control, brake assist, and electronic roll mitigation to help drivers maintain control.

\* Requires trailer-specific weight-distributing hitch. See Owners Manual for details.

† Always drive carefully, consistent with conditions. Always wear your seat belt and obey traffic laws.

• = Included. P = Available within package noted. O = Optional.

<sup>(1)</sup>Late availability. <sup>(2)</sup>Always sit properly in the seat with the seat belt fastened. Always observe the passenger air bag indicator lamp to determine if the OCS classification is appropriate. Children 12 and under should always be in a backseat correctly using an infant or child restraint system or the seat belt positioned correctly for the child's age and weight. <sup>(3)</sup>Always use seat belts. Children 12 and under should always be in a backseat correctly using an infant or child restraint system, or the seat belt positioned correctly for the child's age and size. <sup>(4)</sup>No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESP warning lamp in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Please always wear your seat belt.
